

OUM USSA

Back-End Developer

About Me

I am a driven IT Engineering student and an MPTC Full Stack Development Scholarship recipient at ANT. I approach problem solving with careful reasoning, believing that impactful software comes from understanding the 'why' before writing the code.

- Technical Focus: Specialize in building full-stack web applications with clean, intuitive, and highly refined user experiences.
- Security & Teamwork: Trained in cybersecurity basics to effectively protect and secure applications, while collaborating efficiently as an adaptable team player.

Experience

- Clinic & Pet Management System : Developed a full-stack platform featuring an automated appointment booking system with Node.js/Express.js/Laravel and MySQL.
- WorkSync with Dashboard : Engineered a secure web application focused on workflow management and efficient RESTful API integration.
- Personal Portfolio Dashboard : Designed and developed a minimalist, high-end developer portfolio and dashboard using Vue.js /Node.js / Express.js and modern responsive UI architectures.
- e-examCam: Designed clean, responsive, and intuitive web interfaces using HTML/CSS /Bootstrap and JavaScript.
- Deployment & Tools: Hosted and deployed projects on Linux VPS (Contabo) using aaPanel; utilized Git/GitHub for strict version control.

Education

Royal University of Phnom Penh (RUPP)

Bachelor of Information Technology Engineering (ITE)

Academic Years: 2023 – Present

Expertise

- Backend: Node.js, Express.js, Laravel, MySQL, REST APIs
- Frontend: Vue.js, HTML/CSS, JavaScript, Bootstrap, Tailwind CSS
- Tools: Git & GitHub
- Hosting : Contabo, aaPanel

Language

- Khmer
- English
